4. 60% DEFICIT FORMULA EXAMPLES

How We Calculate Maximum Assistance (For amounts \$5,000+)

Formula: (Annual Costs - Verified Income) × 60% = Maximum Annual Assistance

Example 1: Family of 6

- **Annual Costs:** \$157,674 (from table above)
- **Verified Income:** \$90,000 (both NOAs)
- **Deficit:** \$67,674
- **60% of Deficit:** \$40,604
- **Monthly Assistance:** \$3,384

Example 2: Family of 8

- **Annual Costs:** \$198,074
- **Verified Income:** \$110,000
- **Deficit:** \$88,074
- **60% of Deficit:** \$52,844
- **But Annual Cap:** \$42,000
- **Actual Assistance:** \$42,000 (capped)

Example 3: Family of 4

- **Annual Costs:** \$110,496
- **Verified Income:** \$70,000
- **Deficit:** \$40,496
- **60% of Deficit:** \$24,298
- **Within Annual Cap:** Yes (\$30,000 max)
- **Actual Assistance:** \$24,298

VALIDATION METRICS

Cross-Validation with London UK Study

Metric	Montreal	London UK	Variance
Kosher food premium	40-80%	127%	Similar magnitude
Education per child	\$8,500	£4,420 (\$7,500)	Comparable
Family size average	6-8	7-9	Nearly identical
Religious costs	\$16-22k	£8,574 (\$14.5k)	Same range
Housing premium	20-40%	53.8% (4BR)	Both significant

Conclusion: Our calculations align with international data, validating methodology.

MBM AND IRIS CONTEXT

Why Traditional Poverty Measures Don't Apply

Market Basket Measure (MBM) - Canada's Official Poverty Line

- **Montreal 2025 MBM:** \$47,850 for family of 4
- **Problems for Hasidic families:**
 - Assumes public school (not religious education)
 - Based on average 1.6 children (not 6-8)
 - Uses general food costs (not kosher)
 - No religious obligations included
 - Housing based on median unit (not 5+ bedrooms)

IRIS Living Wage Calculations

- **Montreal Living Wage 2025:** \$25.13/hour
- **Annual for 2 earners:** \$104,540
- **Why inadequate for Hasidic families:**
 - Assumes dual income (many have single earner)
 - Based on 2.2 person household
 - No kosher or religious costs
 - Doesn't scale for large families

Our Adjusted Methodology

We use actual costs specific to Orthodox Jewish families:

- Real kosher food prices (40-80% premium)
 - Actual Jewish day school tuition
 - Required religious expenses
 - Large family housing costs
 - Single-income household reality
-

60% FORMULA RATIONALE

Why 60% of Deficit?

Balancing Principles

1. **Self-sufficiency incentive:** Families retain responsibility for 40%
2. **Charitable resources:** Maximizes help while ensuring sustainability
3. **CRA compliance:** Demonstrates shared responsibility
4. **Community standard:** Aligns with other Jewish charities

Calculation Basis

- **100% coverage:** Creates dependency, removes incentive
- **50% coverage:** Insufficient for genuine need
- **60% coverage:** Optimal balance of support and self-reliance
- **40% family contribution:** Through income, family help, other sources

Evidence of Effectiveness

- Used successfully by similar organizations
 - Prevents welfare dependency
 - Encourages workforce participation
 - Sustainable for charity operations
-

ANNUAL ASSISTANCE CAPS

Maximum Annual Assistance by Family Size

Family Size	Annual Cap	Monthly Max	Rationale
1-2 people	\$18,000	\$1,500	Basic needs
3-4 people	\$30,000	\$2,500	Family support
5-6 people	\$36,000	\$3,000	Large family
7-8 people	\$42,000	\$3,500	Very large
9-10 people	\$48,000	\$4,000	Exceptional

QUICK REFERENCE FORMULAS

For Under \$5,000:

Required: Signed declaration only

Formula: Not applicable - declaration is sufficient

For \$5,000 and Over:

Required: Notice of Assessment both spouses

Formula: $(\text{Annual Costs} - \text{Income}) \times 0.60 = \text{Maximum}$

Emergency Override:

When: Eviction <7 days, utility cutoff <48 hrs, no food + kids <5

Process: Fast-track 24 hours regardless of amount
